INTERNSHIP REPORT

On

React UI of Ice Cream Company with Dashboard CMS

Road Ahead Technologies Private Limited, Jaipur

Submitted by

Shagun Sharma

Enrollment No.: 2411616

Bachelor of Computer Applications (BCA) · Computer Applications

Under the Guidance of

Prof. Ankit Sharma

Software Engineer, Frontend Engineering

Poornima University, Jaipur

Jaipur, Rajasthan · March 2026

— CERTIFICATE —

This is to certify that Mr./Ms. Shagun Sharma, Enrollment No. 2411616, a student of Bachelor of Computer Applications (BCA) in Computer Applications at Poornima University, Jaipur, has successfully completed the internship titled React UI of Ice Cream Company with Dashboard CMS at Road Ahead Technologies Private Limited, Jaipur, during the period from 10 January 2026 to 14 March 2026.

The work presented in this report is original and has been carried out under the supervision of Mr. Rahul Verma, Software Engineer, Frontend Engineering, Road Ahead Technologies Private Limited.

This report is submitted in partial fulfilment of the requirements for the award of the degree of Bachelor of Computer Applications (BCA) from Poornima University, Jaipur.

Mr. Rahul Verma	**Prof. Ankit Sharma**
Software Engineer	Software Engineer
Road Ahead Technologies Private Limited	Frontend Engineering

— DECLARATION —

I, Shagun Sharma, Enrollment No. 2411616, hereby declare that the internship report entitled React UI of Ice Cream Company with Dashboard CMS submitted to Poornima University, Jaipur in partial fulfilment of the requirements for the degree of Bachelor of Computer Applications (BCA) is a record of original work done by me during the internship period from 10 January 2026 to 14 March 2026 at Road Ahead Technologies Private Limited, Jaipur.

I further declare that this report has not been submitted, either in part or in full, to any other university or institution for the award of any degree or diploma. All information and data presented in this report are true to the best of my knowledge and belief.

Any resemblance to previously published work is purely coincidental and unintentional.

Signature: _____

Name: Shagun Sharma

Enrollment No.: 2411616

Programme: Bachelor of Computer Applications (BCA)

Date: 14/03/2026

Place: Jaipur

— ACKNOWLEDGEMENT —

I would like to express my sincere gratitude to all those who have supported and guided me throughout the course of this internship.

First and foremost, I am deeply thankful to Mr. Rahul Verma, Software Engineer at Road Ahead Technologies Private Limited, for providing me with this invaluable opportunity and for their constant guidance, encouragement, and constructive feedback throughout the internship period.

I extend my heartfelt thanks to Prof. Ankit Sharma, Software Engineer, Frontend Engineering, Poornima University, Jaipur, for their academic guidance and continuous support in the preparation of this report.

I am also grateful to the entire team at Road Ahead Technologies Pvt. Ltd. for their cooperation, patience, and willingness to share their knowledge and expertise with me.

Finally, I would like to thank my family and friends for their unwavering support and encouragement throughout this journey.

Shagun Sharma

CHAPTER 1 INTRODUCTION

1.1 Background

Internships serve as a critical bridge between academic learning and professional practice. They provide students with an opportunity to apply theoretical knowledge in real-world environments, develop industry-relevant skills, and gain exposure to organisational culture and work ethics. This internship was undertaken as part of the curriculum requirements for the Bachelor of Computer Applications (BCA) at Poornima University, Jaipur.

The internship was conducted at Road Ahead Technologies Private Limited, a leading organisation in the field of Software Development & UI Engineering, from 10 January 2026 to 14 March 2026. During this period, the intern was assigned to the Frontend Engineering and worked on building a full-stack ice cream brand website with a React-based visitor UI and a CMS admin dashboard.

1.2 Company Profile

Road Ahead Technologies Private Limited was established in 2015 and is headquartered in Jaipur, India. The organisation operates in the Software Development sector and is known for custom web applications, CMS platforms, and React-based UI solutions. With a workforce of approximately 50+ employees and a presence in multiple cities across India, the company has consistently demonstrated excellence in web application development and digital product design.

The company's mission is to deliver innovative, scalable, and user-centric digital solutions that empower businesses to grow. Its vision is to become a leading technology

partner for startups and enterprises across India. Key achievements include successful delivery of 100+ client projects, expertise in React, Next.js, and modern JavaScript ecosystems, and a growing portfolio of CMS-driven web platforms.

1.3 Organisational Structure

The organisation follows a flat structure. The Frontend Engineering where the internship was conducted reports to the Chief Technology Officer (CTO). The team comprises 8–10 full-time professionals specialising in React development, UI/UX design, and backend integration.

The Frontend Engineering team at Road Ahead Technologies is responsible for designing and developing client-facing web applications. The team works closely with backend developers and project managers to deliver pixel-perfect, performant, and accessible user interfaces using modern JavaScript frameworks.

CHAPTER 2 OBJECTIVES & SCOPE OF INTERNSHIP

2.1 Objectives

The primary objectives of this internship were as follows:

1. **To gain practical exposure to React.js, Next.js, and CMS-driven web development in a professional setting.**
2. **To apply academic knowledge of Web Technologies and Database Management to real-world business problems.**
3. **To develop technical proficiency in React.js, Next.js, Tailwind CSS, Prisma ORM, and PostgreSQL used in the industry.**
4. **To understand the workflow, processes, and best practices followed at Road Ahead Technologies Private Limited.**
5. To contribute meaningfully to ongoing projects and deliver measurable outcomes.
6. To enhance communication, teamwork, and professional conduct in a corporate environment.

2.2 Scope

The scope of this internship was defined by the Frontend Engineering Team at Road Ahead Technologies Private Limited and encompassed the following areas:

- **Analysis and documentation of existing UI requirements, brand guidelines, and database schema.**
- **Development and testing of homepage sections, product cards, and admin CRUD forms.**

- **Research and benchmarking of modern React component libraries and CMS patterns.**
- Participation in team meetings, reviews, and presentations.
- Preparation of reports, dashboards, or deliverables as assigned.

The internship did not cover financial records, client billing data, and server infrastructure management due to confidentiality and operational constraints.

CHAPTER 3 WORK DONE / TRAINING DETAILS

3.1 Week-wise Activity Log

The following table summarises the activities undertaken during each week of the internship:

Week	Duration	Activities
Week 1	10 Jan – 17 Jan 2026	Company induction, project briefing, environment setup (Node.js, PostgreSQL, VS Code). Reviewed existing codebase and brand guidelines.
Week 2	18 Jan – 24 Jan 2026	Studied Next.js App Router documentation. Designed database schema using Prisma — models for Products, Categories, StoreLocations, and SiteSettings.
Week 3	25 Jan – 31 Jan 2026	Built the visitor-facing homepage: hero section, stat cards, and featured product spotlight using React components and Tailwind CSS.
Week 4	01 Feb – 07 Feb 2026	Developed Collections, Menu Grid, and Store Locator sections. Implemented responsive layouts with sm/md/lg breakpoints.
Week 5	08 Feb – 14 Feb 2026	Built the Admin CMS dashboard: brand copy editor, collections manager, and product CRUD forms with server actions.
Week 6	15 Feb – 21 Feb 2026	Implemented JWT-based authentication (login/logout), edge middleware for route

		protection, and dark/light theme toggle.
Week 7	22 Feb – 28 Feb 2026	Seeded real product data from Havmor.com. Performed cross-browser and mobile responsiveness testing. Fixed UI bugs.
Week 8	01 Mar – 07 Mar 2026	Code review with mentor, performance optimisation, ESLint fixes, and production build verification.
Week 9	08 Mar – 14 Mar 2026	Final documentation, internship report writing, knowledge transfer, and project handover to the team.

3.2 Projects / Tasks Undertaken

During the internship, the following key projects and tasks were undertaken:

Project 1: React UI of Ice Cream Company with Dashboard CMS

Objective: Build a CMS-driven ice cream brand website with a visitor UI and admin dashboard

Duration: 10 January 2026 to 14 March 2026

Tools / Technologies: React.js, Next.js, Tailwind CSS, Prisma ORM, PostgreSQL

The primary deliverable of this internship was the development of a full-stack ice cream brand website for a fictional premium brand, Polar Swirl, inspired by real-world brands such as Havmor. The visitor-facing site was built using Next.js 16 App Router with React 19, featuring a polished homepage with a hero section, featured product spotlight, collections grid, menu grid, and a store locator. All content — including product names, descriptions, prices, and store details — was sourced from a PostgreSQL database via Prisma ORM, making the site fully CMS-driven. Tailwind CSS 4 was used to implement

a responsive, mobile-first design with support for both light and dark themes using CSS custom properties.

Project 2: React UI of Ice Cream Company with Dashboard CMS

Objective: Build a CMS-driven ice cream brand website with a visitor UI and admin dashboard

Duration: 10 January 2026 to 14 March 2026

Tools / Technologies: React.js, Next.js, Tailwind CSS, Prisma ORM, PostgreSQL

The second major deliverable was a protected Admin CMS Dashboard accessible at /admin. The dashboard allowed an authenticated administrator to manage all site content — including brand copy, product listings, flavor collections, and store locations — through a clean, form-based interface. Authentication was implemented using JWT sessions stored in HTTP-only cookies, with edge-level route protection via a Next.js proxy middleware. Server Actions were used for all form submissions, with Zod-based validation on the server side. The dashboard was fully responsive, with a collapsible sidebar on mobile and a sticky sidebar on desktop.

3.3 Tools & Technologies Used

Tool / Technology	Purpose / How It Was Used
React.js 19	Core UI library for building reusable functional components and managing state.
Next.js 16 (App Router)	Full-stack framework for SSR, server actions, dynamic routing, and production builds.
Tailwind CSS 4	Utility-first CSS framework for responsive, mobile-first design with dark/light theming.
Prisma ORM 6	Type-safe ORM for PostgreSQL — schema design, migrations, and seeding.

PostgreSQL	Relational database storing products, categories, store locations, and site settings.
VS Code / Git	Development environment and version control for code management and collaboration.

CHAPTER 4 LEARNING OUTCOMES & SKILLS GAINED

4.1 Technical Skills

The internship provided significant opportunities to develop and strengthen technical competencies relevant to the Software Development & UI Engineering. The following technical skills were acquired or enhanced during the internship:

- **React.js — Built reusable functional components for the homepage, product grid, and store locator sections.**
- **Next.js App Router — Implemented server-side rendering, dynamic routes, and server actions for form submissions.**
- **Tailwind CSS — Designed a fully responsive, mobile-first UI with dark/light theme support using CSS variables.**
- **Prisma ORM & PostgreSQL — Designed the database schema, wrote migrations, and seeded real product data.**

4.2 Soft Skills

Beyond technical knowledge, the internship was instrumental in developing the following professional and interpersonal skills:

- Communication — Presenting findings to team members and writing professional reports.
- Time Management — Balancing multiple tasks and meeting project deadlines.
- Teamwork & Collaboration — Working effectively within a cross-functional team.

- Problem Solving — Identifying issues and proposing practical solutions.
- Adaptability — Quickly learning new tools and adjusting to the corporate work environment.

4.3 Industry Exposure

The internship offered a comprehensive view of how Software Development organisations operate in practice. Key areas of industry exposure included:

Working at Road Ahead Technologies Pvt. Ltd. provided direct exposure to professional software development workflows, including Git-based version control, code reviews, sprint planning, and client requirement discussions. The internship offered insight into how modern web agencies structure their frontend projects — from component architecture and design systems to database schema design and deployment pipelines. Attending weekly team stand-ups and review sessions helped develop an understanding of Agile development practices in a real commercial environment.

This exposure has significantly broadened my understanding of React-based frontend development and CMS architecture and has reinforced my career interest in full-stack web development.

CHAPTER 5 CONCLUSION & SUGGESTIONS

5.1 Conclusion

This internship at Road Ahead Technologies Private Limited has been an enriching and transformative experience. Over the course of nine weeks (10 January 2026 to 14 March 2026), I had the opportunity to work on the visitor-facing ice cream brand website and the admin CMS dashboard, which allowed me to apply and deepen my academic knowledge in a real-world professional context.

The experience has equipped me with a strong foundation in React.js, Next.js, Tailwind CSS, Prisma ORM, and full-stack web development, and has given me a clearer understanding of the expectations and dynamics of the Software Development sector. Working alongside experienced professionals has instilled in me the importance of precision, collaboration, and continuous learning.

I am confident that the skills, knowledge, and professional insights gained during this internship will serve as a valuable asset as I transition into my career. I am grateful to Road Ahead Technologies Private Limited and Poornima University, Jaipur for providing this opportunity.

5.2 Suggestions

Based on my observations and experience during the internship, the following suggestions are offered in good faith to benefit future interns and the organisation:

1. A structured onboarding programme with clear documentation would help new interns become productive more quickly.

2. Regular feedback sessions between interns and mentors (bi-weekly) would improve alignment and accelerate learning.
3. Providing interns with access to relevant online learning resources or internal training modules would enhance skill development.
4. Assigning interns to cross-departmental projects would broaden their exposure and add greater value to the organisation.
5. **Introducing version control best practices (Git branching strategies) as part of the intern onboarding would significantly improve code collaboration and reduce merge conflicts.**
